## Brainwave Cat Ears

SHOW THE WORLD  
WHAT'S REALLY ON  
YOUR MIND

### Necomimi Brainwave Cat Ears move with your mood, just like a real cat!

Based on safe brainwave technology, Necomimi's cat-like reactive movements show how interested or relaxed you are in real time. Free pizza? Ears up! Chamomile tea time? Ears down.

Necomimi comes with a pair of standard white ears. Additional NEC-cessories are available in Obsidian Black, Minky Brown, and Jungle Leopard, so you can choose the ear color that best suits you!

A big hit at Comic Con, these furry ears are perfect for cosplay, livening up a costume party or entertaining your friends and family. It's a fun and quirky introduction to the world of BCI technology. Brainwave-reading headsets? The future is now!

### Original Necomimi Headset with White Ears

### How Necomimi works

When something grabs your attention, the ears shoot straight up! When you're relaxed, the ears droop down. When you're both focused and relaxed (in the zone), they wiggle!

**Focused**  
Ears perk up

**In the Zone**  
Ears wiggle up and down

**Relaxed**  
Ears droop down
